A call for Resumes **Project Manager**

Anticipated USAID funded Water Pipe Network Expansion and Provision of WASH Services

Background

USAID intends to award a firm fixed price multi-year construction contract to furnish and install water pipes line at two water utilities located in Sanniquellie (Nimba County) and Voinjama (Lofa County), Liberia and the construction of water, sanitation and hygiene (WASH) infrastructure in 26 specified health facilities in Bong, Nimba and Lofa counties Liberia. The American Procurement Services, LLC hereby requests Resume's from qualified Project Managers in anticipation of the subject award.

APSCO LLC is an American Corporation organized in 2010 with its main office located in Wilmington, Delaware the USA with local offices in Monrovia, Liberia at the Intersection of Warren Street and Camp Johnson Road

The company provides international procurement and Engineering services to U.S. Federal government, development agencies, and institutions in developing countries, primarily in the African Region. Our mission is to provide cost effective international procurement services to foreign governments and non-governmental organizations (NGO's) throughout the world.

Minimum Education Requirement

The minimum qualifications include a Bachelor's degree in Civil Engineering, Hydrogeology, Project Management or equivalent technical/engineering fields directly related to engineering, development, project management.

Experience Requirements

- The Project Manager must have minimum of 15 years of progressively responsible and professional experience in managing construction projects of similar scope and complexity with demonstrated strong management and coordination skills.
- Experienced in similar large-scale WASH and municipal water projects is an added advantage
- Demonstrated Progressive responsibilities and supervisory work experience, including direct supervision of professional and support staff and assembling teams of engineers and development professionals.

AMERICAN PROCUREMENT SERVICES, LLC

apsco@americanprocurementco.com

- Specific experience is in project reporting, project performance monitoring, coordination of resources and personnel on multiple work forces, health, safety and environmental compliance and quality assurance is required.
- The candidate must be familiar with construction and logistics in rural Liberia or similar environments, able to interact with key stakeholders, and a working knowledge of, and experience with international development or construction projects.
- The project manager knowledge of the application of the Project Management Institute (PMI) concepts of project management knowledge areas and process groups is an added advantage.

Anticipated Program Role

The Project Manager shall be a full-time staff in Liberia during the project and will have responsibility for authoritative decisions and recommendations having important impact on extensive engineering activities of the project. The Project Manager will initiate and maintain contacts with key engineers, subcontractors and GOL and local authority officials, and requiring persuasion and negotiation skills to resolve critical issues related to the implementation of the project. The individual in this capacity must demonstrate a high degree of creativity, foresight, and mature judgment in anticipating and solving unprecedented engineering complexities, monitoring project performance, achieving project objectives and requirements, organizing planned activities, and developing guidelines for the proposed construction engineering activities.
