Title: Lead, ICT Infrastructure & Operational Technology
Posting Number: S_91
Posting Date: September 21, 2026
Reporting to: Head of Strategic Planning-Operations
Grade Level: S4

Applications will be accepted up to October 4, 2026

Firestone Liberia is seeking an experienced and results-driven **Lead, ICT Infrastructure & Operational Technology** to oversee the design, security, reliability, and continuous improvement of the company's ICT infrastructure and operational technology environment. The successful candidate will lead a team of technical staff and ensure the effective operation of networks, systems, cloud services, cybersecurity controls, and connected operational technologies across offices, factory, engineering, fleet, and field locations.

Key Responsibilities

- Lead the planning, deployment, maintenance, and optimization of ICT infrastructure, networks, servers, cloud services, and end-user systems.
- Supervise Network Technicians and Assistant Network Technicians, ensuring high performance and continuous development.
- Establish and enforce technical standards, cybersecurity controls, and service management processes.
- Manage infrastructure projects, vendor relationships, ICT budgets, and service contracts.
- Ensure proactive monitoring, incident management, disaster recovery, and business continuity readiness.
- Support operational technology integration, including fleet telematics, CCTV, access control, VoIP, and industrial connectivity systems.
- Maintain accurate ICT asset inventories, documentation, and compliance with company policies and audit requirements.

Qualifications & Experience

- Bachelor's degree in information technology, Computer Science, Network Engineering, Cybersecurity, or related discipline.
- Minimum **8 years' experience** in ICT infrastructure, networking, systems administration, and technical operations.
- At least **3 years' leadership or supervisory experience** managing technical teams or multi-site ICT services.
- Strong experience with enterprise networks, Microsoft 365/Azure, cybersecurity, virtualization, backup and recovery solutions, and project delivery.

Preferred Qualifications

- Professional certifications such as **CCNA, CCNP, Microsoft, CompTIA Network+/Security+, ITIL, or Fortinet.**
- Experience with operational technology, industrial networks, fleet telematics, CCTV, access control, VoIP systems, and ERP/business applications.

Key Competencies

- Leadership and team management
- Network engineering and infrastructure management
- Cybersecurity and risk management
- Project and vendor management
- Problem-solving and analytical thinking
- Communication and stakeholder engagement

Application Process: Interested candidates should submit their resume to the Human Resources Department or email FSLBHR@bfusa.com Please reference Posting Number **S_91** on all application documents. **Only shortlisted candidates will be contacted.**
